

GENERAL NOTES:

1. Detail intended for nonstructural applications.
2. Stud depth, spacing and thickness based on height of wall and design load. Consult SFIA **Technical Guide for Cold-Formed Steel Framing Products** for limiting heights.
3. Source: **GA600 Fire Resistance Design Manual** and **GA 216**.
4. Engineering studies and fire tests indicate may be used in some nonstructural partition assemblies without reducing the fire-resistance of the partition - refer to **GA600**.
5. No fasteners between gypsum panels, track and steel stud.
6. Provides perimeter relief.
7. Gypsum panel type and thickness as required to meet design considerations.

DISCLAIMER: This detail must not be used without a complete evaluation by the owner's design professional to verify validity of the design.
